Question 15 Share

Question #131

What is the most severe failure from which an Azure Availability Zone can be used to protect access to Azure service?

A a physical server failure

B an Azure region failure

C a storage failure

D an Azure data center failure **Most Voted**

Correct Answer:
D
Availability zones expand the level of control you have to maintain the availability of the applications and data on your VMs. An Availability Zone is a physically separate zone, within an Azure region. There are three Availability Zones per supported Azure region.
Each Availability Zone has a distinct power source, network, and cooling. By architecting your solutions to use replicated VMs in zones, you can protect your apps and data from the loss of a datacenter. If one zone is compromised, then replicated apps and data are instantly available in another zone.

Question #132

You need to purchase a third-party virtual security appliance that you will deploy to an Azure subscription. What should you use?

A Azure subscriptions

B Azure Security Center

C Azure Marketplace **Most Voted**

D Microsoft Store

Correct Answer:
C

Question #133

DRAG DROP -
Match the serverless solution to the correct characteristic.
To answer, drag the appropriate serverless solution from the column on the left to its characteristic on the right. Each serverless solution may be used once, more than once, or not at all.
NOTE: Each correct match is worth one point.

Select and Place:

Correct Answer:

Box 1: Azure Functions -
Azure Functions allows you to implement your system's logic into readily available blocks of code called "functions". Different functions can run anytime you need to respond to critical events.

Box 2: Azure Functions -
Azure Logic Apps can have multiple stateful and stateless workflows.

Box 3: Azure Logic Apps -
Azure Logic Apps is a cloud-based platform for creating and running automated workflows that integrate your apps, data, services, and systems.

Question #135

HOTSPOT -
Select the answer that correctly completes the sentence.
Hot Area:

Answer Area

An Availability Zone in Azure has physically separate locations

- across two continents
- within a single Azure region
- within multiple Azure regions
- within a single Azure datacenter

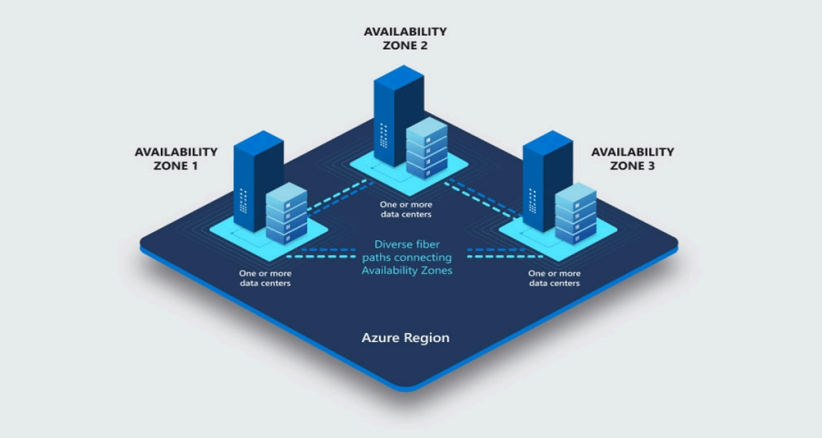

Correct Answer:

Answer Area

An Availability Zone in Azure has physically separate locations

across two continents
within a single Azure region
within multiple Azure regions
within a single Azure datacenter

Box: within a single Azure region
Azure availability zones are physically separate locations within each Azure region that are tolerant to local failures.

Reference:
https://docs.microsoft.com/en-us/azure/availability-zones/az-overview

Question #136

DRAG DROP -
Match the Azure services to the correct descriptions.

Instructions: To answer, drag the appropriate Azure service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.
NOTE: Each correct match is worth one point.
Select and Place:

Correct Answer:

Box 1: Azure virtual machines -
Box 2: Azure Container instances
Azure Container Instances (ACI) is a managed service that allows you to run containers directly on the Microsoft Azure public cloud, without requiring the use of virtual machines (VMs).
Develop apps fast without managing virtual machines or having to learn new toolsâ€"it's just your application, in a container, running in the cloud.

Box 3: Azure App Service -
Azure App Service is a fully managed platform for building web applications.
Applications run and scale with ease on both Windows and Linux-based environments.

Box 4: Azure Functions -
Azure Functions (from Microsoft Azure) is a cloud-based serverless service that allows running event-triggered code in a scalable way without providing or managing infrastructure.

Question #137

HOTSPOT -
To answer, select the appropriate option in the answer area.
Hot Area:

Answer Area

You have several virtual machines in an Azure subscription. You create a new subscription.

The virtual machines cannot be moved to the new subscription.
The virtual machines can be moved to the new subscription.
The virtual machines can be moved to the new subscription only if they are all in the same resource group.
The virtual machines can be moved to the new subscription only if they run Windows Server 2019.

Correct Answer:

Answer Area

You have several virtual machines in an Azure subscription. You create a new subscription.

The virtual machines cannot be moved to the new subscription.
The virtual machines can be moved to the new subscription.
The virtual machines can be moved to the new subscription only if they are all in the same resource group.
The virtual machines can be moved to the new subscription only if they run Windows Server 2019.

Box: The virtual machines can be moved to the new subscription.

You can move a VM and its associated resources to a different subscription by using the Azure portal.

Note: Repeat the process below for each Resource Group containing the VMs.

1. Go to the Azure portal to manage the resource group containing the VM to move. Search for and select Resource groups.
2. Choose the resource group containing the VM that you would like to move.
3. At the top of the page for the resource group, select Move and then select Move to another subscription. The Move resources page opens.
4. Select each of the resources to move. In most cases, you should move all of the related resources that are listed.
5. Select the Subscription where you want the VM to be moved.
6. Select an existing Resource group, or enter a name to have a new resource group created.
7. When you are done, select that you understand that new resource IDs will be created and that the new IDs will need to be used with the VM after it is moved, and then select OK.

Reference:
https://docs.microsoft.com/en-us/azure/virtual-machines/windows/move-vm

Question #138

You need to purchase a third-party virtual security appliance that you will deploy to an Azure subscription. What should you use?

A Azure subscriptions

B Microsoft Defender for Cloud

C Azure Marketplace **Most Voted**

D Microsoft Store

Correct Answer:
C
You can access these enhanced network security features by using an Azure partner solution. You can find the most current Azure partner network security solutions by visiting the Azure Marketplace, and searching for "security" and "network security." Some third-party reseller services available on Azure Marketplace now consume your Enterprise Agreement (EA) Azure Prepayment balance.

Question #139

HOTSPOT -
Select the answer that correctly completes the sentence.
Hot Area:

Answer Area

[▼] is a highly secure IoT solution that includes a microcontroller unit (MCU) and a customized Linux operating system.

- Azure Arc
- Azure IoT Central
- Azure IoT Hub
- Azure Sphere

Correct Answer:

Answer Area

[Azure Sphere ▼] is a highly secure IoT solution that includes a microcontroller unit (MCU) and a customized Linux operating system.

Microsoft's Azure Sphere hardware and service designed to better secure Internet of Things (IoT) devices.
Azure Sphere consists of Microsoft-certified microcontrollers â€" single-chip computers with processors, storage, memory and IoT capabilities

ز€" plus the Azure
Sphere Linux-based OS and the Azure Sphere cloud security service.

Question 20 Share

Question #140

You plan to deploy a service to Azure virtual machines.
You need to ensure that the service will be available if a datacenter fails.
What should you use as part of the virtual machine deployment?

A availability sets

B proximity placement groups

C host groups

D availability zones Most Voted

Correct Answer:
D

Azure availability zones are physically separate locations within each Azure region that are tolerant to local failures. Failures can range from software and hardware failures to events such as earthquakes, floods, and fires. Tolerance to failures is achieved because of redundancy and logical isolation of Azure services. To ensure resiliency, a minimum of three separate availability zones are present in all availability zone-enabled regions.
Reference:
https://docs.microsoft.com/en-us/azure/availability-zones/az-overview
